- High payload capacity
- High turning capability due to the single-axle design
- Base frame compl. in alum. – no rusting
- Authorized to 100 km/h
- Container can be placed on and taken off with forklift
- All tank capacities of the KUBICUS<sup>®</sup> series can be structured on the very same frame
- Fast dismantling of the container
- Equipment according to GGVSE
- Transport without hazardous goods certificate according to the 1000-pt regulation

### Transport trailer features:

- Base frame completely of aluminum
- Single-axle transport trailer
- 2x parking supports
- Air-tire industrial support wheel
- 2x wheel chocks
- 2 kg fire extinguisher
- Note provision on the container corr. to GGVSE
- 13-pole current plug connector
- Parking brake
- C-tire arrangement
- Authorized to 100km/h
- Lockable tool box
- Stand platform for container operation

### Technical data transport trailer

Type	TA 1800
Permissible total weight	1800 kg
Overall width	1720 mm
Overall length	3300 mm
Platform size (W x L)	approx. 1250 x 1750 mm
Dead weight without containers	270 kg
Payload with 1,000 litre diesel*	approx. 315 kg
Dimensions of tool box (L x H x W)	approx. 1250 x 550 x 600 mm

\*This value is dependent on the attached tank capacity and the possible fuel storage quantity.

Other transport trailer sizes are possible on request.
